BELLUSCURA LTD LAUNCHES WIRE CADDY™ IN USA

Tekcapital plc (AIM: TEK), an international provider of technology and intellectual property services, announces that Belluscura Ltd ("Belluscura") has launched its Wire Caddy™ product in the United States.

The Wire Caddy™ is an innovative wire management system that provides lubrication and organization during multi-wire, multi-exchange operating room cases, such as cardiology interventions, uterine fibroid embolizations and tibial angioplasties.

The Wire Caddy™ was designed by interventional radiologist Dr Shaun Samuels to address unique challenges in complex surgical procedures, especially those involving multi-wire and multi-exchange cases. Its unobtrusive positioning allows quick access to lubricated guidewires during surgical procedures in interventional radiology, catheterization laboratory, vascular suite and other operating room operations. Belluscura's Wire Caddy™ is particularly useful for single operators, interventional radiology trainees, fellows and residents.

Belluscura's Chief Executive Officer Bob Rauker said:

"Wire Caddy™ is an excellent component in our product portfolio, which offers premium and affordable solutions to meet the needs of the patient and healthcare providers".

About Belluscura:

Belluscura Limited is a global medical device company founded in Oxford, England. Its mission is to make healthcare more affordable for patients and their providers by providing proprietary medical devices across a wide variety of treatment and diagnostic disciplines. Belluscura's products were originally developed by leading medical device companies or research centres, and with its unique business model it is able to offer these devices at affordable prices. To learn more about Belluscura please visit www.belluscura.com.

Tekcapital owns approximately 65% of the share capital of Belluscura.
